- a) ☐ All b) ☐ Some* c) ☐ None of the:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).
- * Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
- (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
- 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
- (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

DETAILED ACTION

And

EXAMINER'S REASONS FOR ALLOWANCE

1. Claims 1-20 are allowed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

While *Breese* teaches, a computer simulation method for modeling the response of one or more agents to real world input data and *Tsikalas* teaches real-world input includes one or more sources from a group consisting of news sources, broadcast media, communications and interactions between participants, **none of these references taken alone or in combination with the prior art of record disclose**, traversal through linked behavioral state variables of the computerized agent response from an input linkage stage to a terminating linkage stage in terms of order of linked behavioral state variables traversed, in combination with displaying the order of traversals and ratings for linked behavioral state variables in a simulation output in a visual form depicting interaction of the agent in the computer simulation with the selected sources of real-world input, specifically including:

(claim 1) "...traversal through linked behavioral state variables of the computerized agent response from an input linkage stage to a terminating linkage stage in terms of order of linked behavioral state variables traversed, in combination with displaying the order of traversals and ratings for linked behavioral stat variables in a simulation output in a visual form depicting interaction of the agent in the computer simulation with the selected sources of real-world input..."

Art Unit: 2123

(claim 14) "...whereby a traversal through linked behavioral state variables of the computerized agent in response to an element or series of elements in the real-world input data can be monitored from an input linkage stage to a terminating linkage stage in terms of order of linked behavioral state variables traversed and probability rating for the element or series of elements for each of the behavioral state variables traversed *and* providing for a display in a visual form of the order of traversals and ratings for linked behavioral state variables in a computer simulation output depicting interaction of the agent with the selected source of real-world input data..."

(claim 19) "...whereby a traversal through linked behavioral state variables of the computerized agent in response to an element or series of elements in the real-world input data can be monitored from an input linkage stage to a terminating linkage stage in terms of order of linked behavioral state variables traversed and probability rating for the element or series of elements for each behavioral state variables traversed *and* wherein the display depicts the order of traversals and ratings for linked behavioral state variables in a computer simulation output depicting the interaction of the agent with the selected source of real-world input data...", **in combination with the remaining elements and features of the claimed invention.** It is for these reasons that the applicants' invention defines over the prior art of record.

2.1 Dependent claims 2-13, 15-18 and 20 are allowed for at least the reason that they depend upon an allowed base claim.

2.2 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
